

Admitting your patient to Calvary
John James Rehabilitation Unit

is as easy as 1-2-3

Does your patient require additional assistance to reach their maximum independence following surgery, an accident or major illness and is no longer clinically required to be in an acute hospital facility?

1 Please call a member of the multidisciplinary team on 6281 8116 to discuss your patients requirements.

2 Complete and return a referral form.

3 If suitable, admission will be arranged and an individual care plan with realistic goals will be established in consultation with the patient, our rehabilitation physicians and the nursing and allied health team.

Calvary John James Rehabilitation Unit is focused on providing the care, therapy and support needed to assist your patient towards attaining maximum independence.

Calvary John James Hospital
173 Strickland Crescent, Deakin ACT 2600
