# March is Standard 5

## “ Standard 5 Comprehensive care”

This month we are focusing on the following e-Learning;

- **NEW Standard 5 - Preventing Falls & harm from Falls**  
(Replacing Standard 10 – Preventing Falls & harm from falls)
- **Pressure injuries**
- **Dementia Something has changed**
- **PCA/Epidural Competencies**

### Mental Health Deterioration

Look out for the mental health deterioration policy which is being rolled out at Calvary in the coming weeks.

### Delirium management

Between September & November 2020, 70% of the coded delirium occurred in the post-operative patient. Please ensure you are familiar with the procedure to assess, monitor and treat delirium.

### Falls facts . . . . .

- Inpatient falls is one of the highest clinical risks at Calvary
- We have seen a number of falls with serious harm (fractures) in the last 12 months
- Falls are happening across all areas
- Falls with injury;
  - increase the LOS
  - increase the risk of other hospital acquired complications
  - affect the patients confidence
  - increase cost of hospital stay
- Most months there are patients who have repeated falls
- Hourly rounding (including toileting regimens) decrease the incidents of falls, as a number of the falls are due to walking to or away from the bathroom.
- Falls rate FY 20/21 to date is 3.24 per 1000 bed days (this equates to **150 patient falls in 8 months!**)

They were;

- 7 HARM score 2 (fractures/ serious injury)
- 63 HARM score 3 (minor injury)
- 80 HARM score 4 (near miss or no harm)
