Community Care

Hospitals

Retirement Communities

Welcome to Calvary Health Care Bethlehem

Calvary Health Care Bethlehem is a publicly funded Hospital that is recognised as a Specialist Palliative Care Service and a Statewide provider for those with Progressive Neurological Disease.

Our model of care is patient-centred and goal focussed. We work with patients and their families to improve quality of life and to live well. Our interdisciplinary teams provide care in a range of settings including centre based clinics, Day Centre, inpatient beds and home based care.

Honouring the past, Embracing the future

For 75 years, Calvary has grown and changed with the Caulfield community. To reflect the community's changing health care needs, Calvary Health Care Bethlehem is planning to extend the services we provide to our patients, residents and the local community by expanding our care in the home as well as offering independent living, residential care and community care options as part of an integrated health precinct.

Bethlehem patients enjoy the benefits of the health service's art and music therapy programs
